

# Barrel Topper Debris Filter

- Hole size minimum: 3 3/8"
- Apply silicone caulk to bottom of box if desired

- Position barrel under downspout. You may need to add elbows or flex pipe to get to the proper location.
- Position downspout near the top of the back of the box. You want plenty of clearance for debris to fall out of the downspout.

- Position "L" brackets and screw into place with screws provided.
